

of his army, which is said to be from 4,000 to 6,000 strong. He has notified Gen. T. to retire from this to our old camp at Corpus Christi;—FALLING TO DO THIS BY TWO O'CLOCK TO-MORROW he is going to open the batteries upon us! The declaration further says that upon us will rest the responsibilities of a long and bloody war, which, so far as they are concerned, will be carried on with a strict regard to the rules and observations of civilized nations. They stated verbally that they were directed to say that they had no knowledge of Col. Cross whatever—and expressed their sincere regret that they were unable to give us any information upon the subject. An express was started immediately for Pt. Isabella, for more ammunition, and to place them on their guard; the dispositions of the camp are already being changed, and a large command of Dragoons is ordered for secret service after dark. You cannot imagine how arduous this service is upon the Dragoons. They have been out 7 times this month on outlying pickets, and only yesterday rode 43 miles before 3 o'clock.

A prisoner has just been brought in by the picket. He says the enemy are going to cross the river at a certain point to-morrow. A squadron goes with him to the place at daylight—1500 men are hard at work at the ramparts and traverses, and Gen. T. and his staff just now passed by at a gallop—all showing that matters are growing serious. The lower picket also reported about an hour since a large body of cavalry on their way down the river bank about 4 miles below. On the other side of course.

Another Sea Serpent.

A strange fish was seen swimming past Vevay, Ia., on Monday week, with his head elevated, and occasionally giving a snort somewhat resembling the noise made by the scape-pipe of a steamboat. A couple of men on shore, excited by curiosity at the remarkable phenomenon—a living thing making its way down the stream without any evident sign of turning to either shore—went out with a skiff, resolved to capture the "varmint," and upon reaching it an old blind horse, scarce able to keep his nose above the water longer, greeted them with a hearty snuffle, in token of gratitude for their timely aid. Whether his horsemanship embarked at Pittsburg or Wheeling has not yet been satisfactorily ascertained.

The National Fair.

The vast building now in the course of erection at Washington, for the purpose of exhibiting the various articles of American industry and skill during the fair, which will be opened on the 20th inst, will be the largest of the kind in the country. It is in the form of a T; the top of the T is 160 feet long by 60 wide, and the shaft of the T is 240 feet long by 60 feet wide, making the whole building 500 feet long by 60 wide, and the sides are 15 feet high. It contains an area of 30,000 square feet or 3,333 square yards, and is lighted by 36 large windows in the roof. The roof is to be covered with painted canvass over the boarding, of which it will take 4,222 square yards. There are two sheds, one each side, 240 feet long and 20 wide, which cover an area of 4,800 square feet, making the entire area covered 34,800 square feet.

The exhibition is intended to comprise all kinds of articles and fabrics and the arrangements are such that every article sent to the Committee will be faithfully taken care of, fairly exhibited and safely returned to its proper owner. Mechanics and Manufacturers,—from the citizens whose only capital is his skill and industry, up to the wealthiest operator whose money gives employment to hundreds,—are expected to contribute to the great National display of home labor.

Lusus Naturæ.

We understand that Ruel Jefferis, near Romansville, Chester county, has a lamb whose hind legs are so much shorter than its fore that it appears to be resting upon them. These also appear double jointed, and there are ten toes to each. Altogether, there are twenty toes more than ordinary. The lamb is about three months old.
